

## Abstract

The invention relates to a vehicle sensor (4) for detecting impact sound, said  
5 sensor comprising a measured-value sensor (4.1) for detecting the impact  
sound. The measured-value sensor (4.1) comprises several individual,  
separate measured-value sensing elements (4.1.x), each of which is coupled  
to a vehicle structure (5) in such a way that impact sound waves are  
transmitted by the vehicle structure (5) to the measured-value sensing  
10 elements (4.1.x).
